- **Developer Tools:** Git, GitHub, Docker, ChatGPT, Gemini, Claude, GitHub Copilot
- **Databases and Cloud:** PostgreSQL, SQL, MongoDB, AWS

EXPERIENCE

Undergraduate Research Assistant

Dec 2025 – Present

BYU Family History Technology Lab

- Develop full-stack features for Relative Finder using Angular and Node.js, supporting 10,000+ monthly active users.
- Built a customizable ancestor-collage feature and integrated the FamilySearch API to automate data refreshes and reduce manual synchronization.
- Conduct HCI studies and incorporate user feedback to improve UI accessibility and workflow usability.
- Collaborate with researchers and designers while strengthening deployment quality through code reviews and automated testing.

For the Strength of Youth Counselor

Summer 2026

For the Strength of Youth

- Led and mentored youth groups at multi-day conferences across the United States, teaching classes, facilitating discussions, organizing activities, and resolving conflicts in English and Spanish.

Full-Time Missionary (Spanish Speaking)

Jul 2024 – Dec 2025

The Church of Jesus Christ of Latter Day Saints

- Trained and mentored 20+ missionaries across 8+ companionships while coordinating weekly goals and operational logistics.
- Held leadership roles as Sister Training Leader, Missionary Trainer, and Social Media Office Representative while communicating daily in Spanish with diverse communities.

PROJECTS

Project GIFT | *React, Vercel, AWS S3, HTML, CSS*

August 2026 – Present

- Worked with Family Search to make an application to help people find ancestors quickly.

ScripShare | *JavaScript, TypeScript, HTML, CSS*

May 2026 – Present

- Developing a full-stack scripture study application designed for users seeking meaningful study experiences during short periods of free time. Conducted user research through surveys to identify study habits, preferences, and barriers to consistent scripture study.
